## DETAILED ACTION

### *Claim Objections*

1. Claim 1 is objected to because of the following informalities: Claim 1 recites "periila". It appears as if the proper spelling is --perilla--. Appropriate correction is required.
2. The disclosure is objected to because of the following informalities: Page 1, line 17 recites "celluroses". Page 2, line 4 recites "take". The specification appears to be a translation and is replete with similar grammatical errors. Applicant is requested to check the entire specification for similar errors.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin in view of Webster's 3rd New International Dictionary, Finberg (US 2,930,719) and Horimoto (US 4,620,554). Shin discloses a tobacco substitute composition comprising Eucommia leaves, licorice, honey and peppermint mixture. Licorice reads on the claimed glycyrrhiza glabra in view of definitions found in Webster's 3rd New International Dictionary. Shin does not teach using

Art Unit: 1731

licorice within the claimed range of 1-10%. Finberg teaches using licorice as flavourant in a casing material in a tobacco substitute at 4%. See column 3, line 70. It would have been obvious to one skilled in the art at the time of the invention to add the licorice to the tobacco substitute of Shin at 4% as taught by Finberg because it would accomplish no more than the expected result of flavoring the composition. Shin also does not teach adding 1-10% of perilla frutescens, also called Beefsteak according to Webster's 3rd New International Dictionary. Horihito teaches using Beefsteak, Japanese mint, peppermint and vanilla interchangeably as flavourants in a smoking composition from 1-10%. See column 1, lines 53-55. It would have been within the purview of one skilled in the art at the time of the invention to add a combination of beefsteak and Japanese mint as flavorants to the composition of Shin because Horihito teaches the aseptic action and tasteful properties of beefsteak (see column 2, lines 10-20) and the refreshing feel and taste properties of Japanese mint.

Regarding claim 2, Shin discloses a glycerol. See Abstract.

Regarding claim 3, Shin discloses using peppermint. Furthermore, Horihito discloses using peppermint in combination with beefsteak and Japanese mint within the claimed ranges. See column 2, list 1.

5. When filing a FAX in Group 1700, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for Draft Documents and other Communications with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.
